Pel-Freez®

Analysis Certificate/Origin

PRODUCT: Bovine Gamma Globulin

CODE NO: 27005

LOT NO: 23835

**DATE OF
MANUFACTURE:** August 26, 2013

ORIGIN: USA

STORAGE: 2-8°C

EXPIRATION: Suggested retest after 3 years.

RECONSTITUTION: Reconstitute in at least 0.2% NaCl solution.

PROCEDURE: Bovine gamma globulin is purified from normal bovine serum or plasma collected in a USDA certified facility within the contiguous 48 states of the United States (documentation is on file). The processing of serum/plasma into gamma globulin was achieved exclusively at Pel-Freez Biologicals facilities using a combination of existing methods developed in our laboratory.

ASSAYS: This lot of Bovine Gamma Globulins contains 99% gamma globulin, which is less than 5% impurities as determined by serum protein electrophoresis (percent of the total protein present).

Protein by Weight - O.D. 280 nm $E^{1\%} = 1.39 = 86\%$. Residual salts, lipids, etc. comprise the rest of the weight.

Immunoelectrophoresis: At 10 mg/ml, the precipitin pattern observed was characteristic of bovine serum when tested with anti-whole bovine serum. The predominant band was in the IgG region.

Moisture Content: 3.37% (FIO)

QUALITY ASSURANCE

Product Released on: September 23, 2013
