Pel-Freez[®] Analysis Certificate

PRODUCT: Bovine Pituitary Extract

CODE NO: 57136

LOT NO: 22934

**DATE OF
MANUFACTURE:** August 16, 2012

STORAGE: -10°C or below

PROCEDURE: Fresh frozen pituitaries are obtained from normal healthy bovine cattle. The pituitaries are extracted using a saline extraction. The extract is filtered through a 0.2 micron filter. The extract remains at or below +5°C throughout the procedure until the product is frozen. Tissue was sourced from a USDA certified facility within the contiguous 48 states of the United States where the animals received ante and post mortem inspection and were found free of contagious diseases

ASSAYS: Total Protein 2.32 g/dl (FIO)
pH 6.61 (FIO)

NOTE: **Manufacturer recommends sterile filtration prior to use in cell culture.**
