PRODUCT: Bovine Spleen

CODE NO: 57149

LOT NO: 01838

STORAGE: At or below -10° C

PROCEDURE: Bovine spleens were collected in the contiguous 48 United States. Each tissue was obtained from individual animals at USDA or equivalent facilities where the animals receive ante and post mortem inspection and are found free of contagious diseases. Freshly cleaned instruments were used to harvest from each animal to help prevent cross contamination. Tissues from each animal were bagged separately.
