

Rabbit Complement, Unadsorbed

Product Data Sheet · P/N 74014 Rev 02 · Reissued 2026-09-19 (layout only)

Product code	Pack size
31060-1	100 mL
31060-2	5 mL
31060-5	500 mL

Description

Complement is collected from rabbits (*Oryctolagus cuniculus*) Breeds: New Zealand White and/or California White that are 8-12 weeks of age.

Physical State

Frozen liquid

Testing

Hemolytic titer: $\geq 1:16$

Application Notes

Reportedly suitable for HLA -ABC tissue typing /lymphocytotoxic assays. Product is tested for titer. Complement components are extremely heat-sensitive; for best results, thaw complement on ice or in a cold water bath (ideally thaw bottled complement under a stream of cold water, -20°C); never thaw using warm or hot water. Single-use aliquots may be made at this time and frozen at -70°C. Avoid multiple freeze-thaw cycles. When a working aliquot is thawed, do not re-freeze remaining complement but discard it.

Packaging

5 mL: Glass vial; 100 mL and 500 mL: Polypropylene bottle

Storage Temperature

-70 °C or below

Shipping Conditions

Dry ice

Expiration

Product quality is guaranteed to meet Pel-Freez Biologicals' specifications for 1 year from the date of receipt by the customer as long as the product is stored in accordance with the indicated storage conditions.
