Description

Rabbit whole blood is collected from individual, healthy, young rabbits (*Oryctolagus cuniculus*)

Breeds: New Zealand White and/or California White that are 8 - 12 weeks of age, mixed sex at time of slaughter, into 2.5% EDTA at a 9:1 ratio, bottled and stored on wet ice prior to shipment.

Physical State

Fresh, non-frozen liquid

Testing

No analytical testing is performed on this product. The blood is visually inspected at the time of bottling to ensure the absence of clots.

Packaging

Polypropylene bottle with lid

Storage Temperature

2 – 8 °C

Shipping Conditions

This product is shipped fresh on wet ice at 2 – 8 °C.

Expiration

This product is perishable. The exact shelf life will depend on the user's application.

For research use or further manufacturing only. Not for use in diagnostic procedures, or for human or animal consumption.
