Description

Whole blood is collected from healthy pigs (mixed breed, either sex) at the time of slaughter at USDA or state inspected facilities, mixed with 1 part 2.5% Disodium EDTA to 9 parts blood. The plasma is separated from cellular components by centrifugation, processed within 24 hours and frozen at -20°C.

Physical State

Frozen liquid

Application Notes

Reportedly useful protein purification.

Packaging

Polypropylene bottles

Storage Temperature

-20 °C or below

Shipping Conditions

Dry ice

Expiration

Product quality is guaranteed to meet Pel-Freez Biologicals' specifications for 1 year from the date of receipt by the customer as long as the product is stored in accordance with the indicated storage conditions.

For research use or further manufacturing only. Not for use in diagnostic procedures, or for human or animal consumption.
