

PRODUCT DATA SHEET**Product Name:** ANTI-AMYLOID PRECURSOR PROTEIN ANTIBODY**Product Code:** P40000-100**Pack Size:** 100 µL

Description: A large body of evidence has implicated the amyloid precursor protein (APP) in the pathogenesis of Alzheimer's disease (AD) (Kamenetz et al., 2003). The phosphorylation of APP at Thr⁶⁶⁸ is thought to play a critical role in generation of the soluble APP (*beta*) and *beta*-amyloid peptide (*abeta*) which are the major components of senile plaques in patient brains inflicted with AD (Liu et al., 2003; Ando et al., 2001).

Physical State: Liquid; Buffer contents: 10 mM HEPES (pH 7.5), 150 mM NaCl, 100 µg per mL BSA and 50% glycerol

Storage/Stability: Stable at -20 °C for at least 1 year. For long term storage -20 °C is recommended

Purification Method: Prepared from rabbit serum by affinity purification on a column made with the C-terminal peptide used as antigen.

Shipping Conditions: Domestic: Blue Ice
International: Blue Ice or Dry Ice

Host Species: Rabbit (Polyclonal)**Mr (kDa):** 115

Immunogen: Peptide corresponding to amino acid residues from the C-terminal region of rat APP. Immunolabeling of the APP protein band is completely blocked by preadsorption of the antibody with the peptide used as antigen.

Species Reactivity: The antibody has been directly tested for reactivity in rat tissue. It is anticipated that the antibody will also work with canine, chicken, human, mouse and non-human primate tissues based on the fact that these species have 100% homology with the amino acid sequence used as antigen.

Recommended Antibody Dilutions:**WB: 1:1000****References:**

Western Blot

Rat hippocampal lysate showing specific immunolabeling of the ~115k APP protein.

**Application Key:** WB – Western Blot IF – Immunofluorescence IHC – Immunohistochemistry IP - Immunoprecipitation

FOR RESEARCH USE ONLY. NOT FOR USE IN DIAGNOSTIC PROCEDURES.
